An **ancestor table** (from German language *ahnentafel*) is a family tree where people are shown in a numbered list instead of a tree.

In the table, a person is listed as number 1, the father is 2, the mother is 3. Then, the grandparents can be added:

- the father's father is 4
- the father's mother is 5
- the mother's father is 6
- and the mother's mother is 7.

This can continue even farther, including the great-grandparents:

- the father's father's father is 8
- the father's father's mother is 9
- the father's mother's father is 10
- and so on.

The title 'Family Tree' is written in a large, elegant, cursive script. It is enclosed within a decorative, swirling oval frame that also features cursive flourishes.

# Family Tree.

An eminently practical set of charts  
for the compiling of genealogical information,  
so arranged that eight generations of the ancestors  
of any person may be recorded in a connected and simple form,  
as devised by WILLIAM H. WHITMORE, Esquire,  
and first published at Boston in 1885  
under the title  
"Ancestral Tablets"

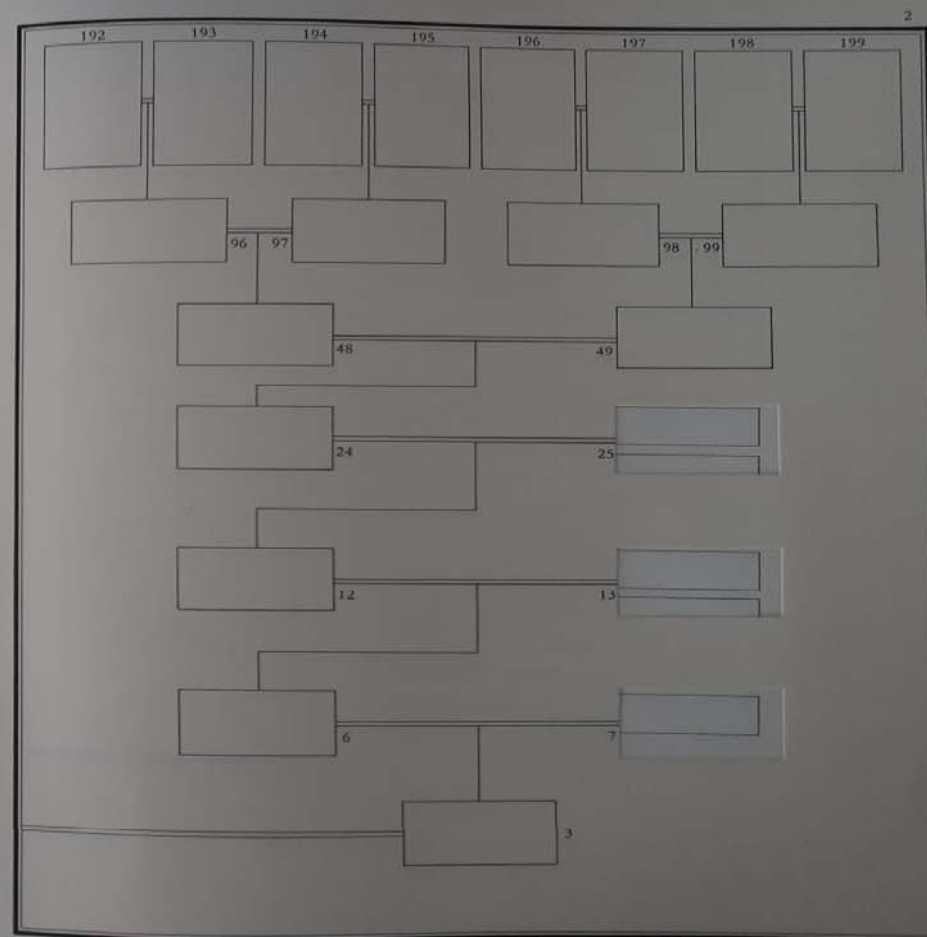

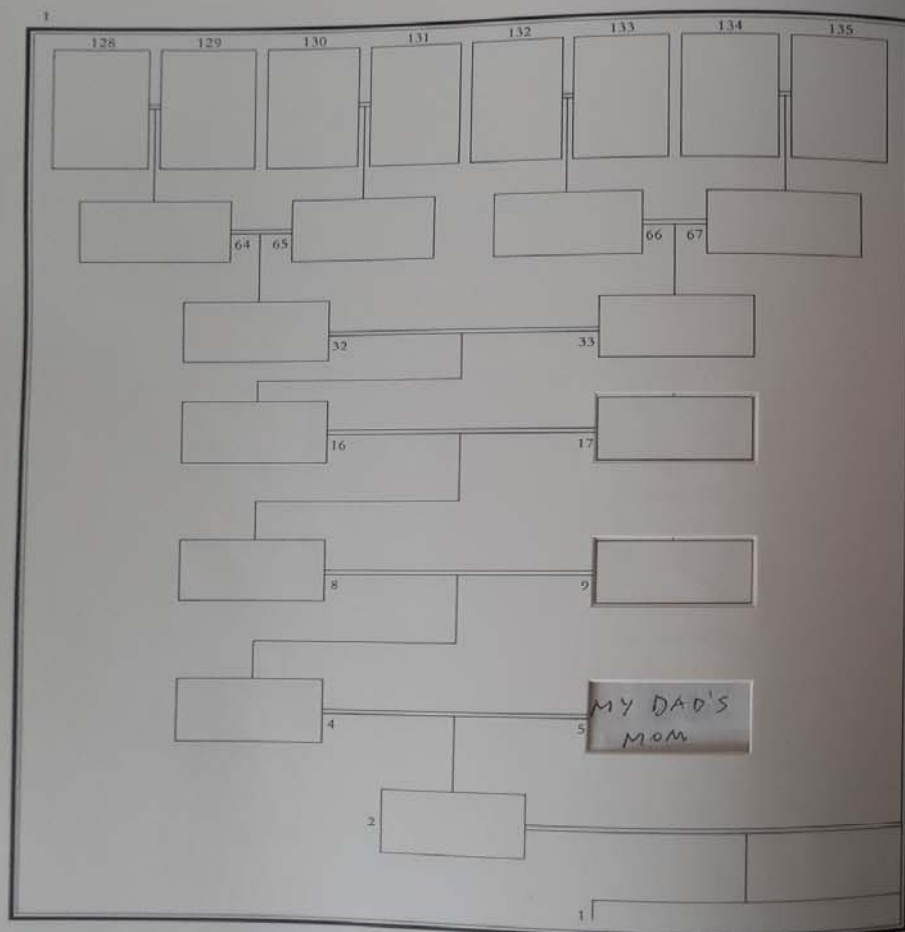

In 1885 William Henry Whitmore created the book format called Ancestral Tablet.

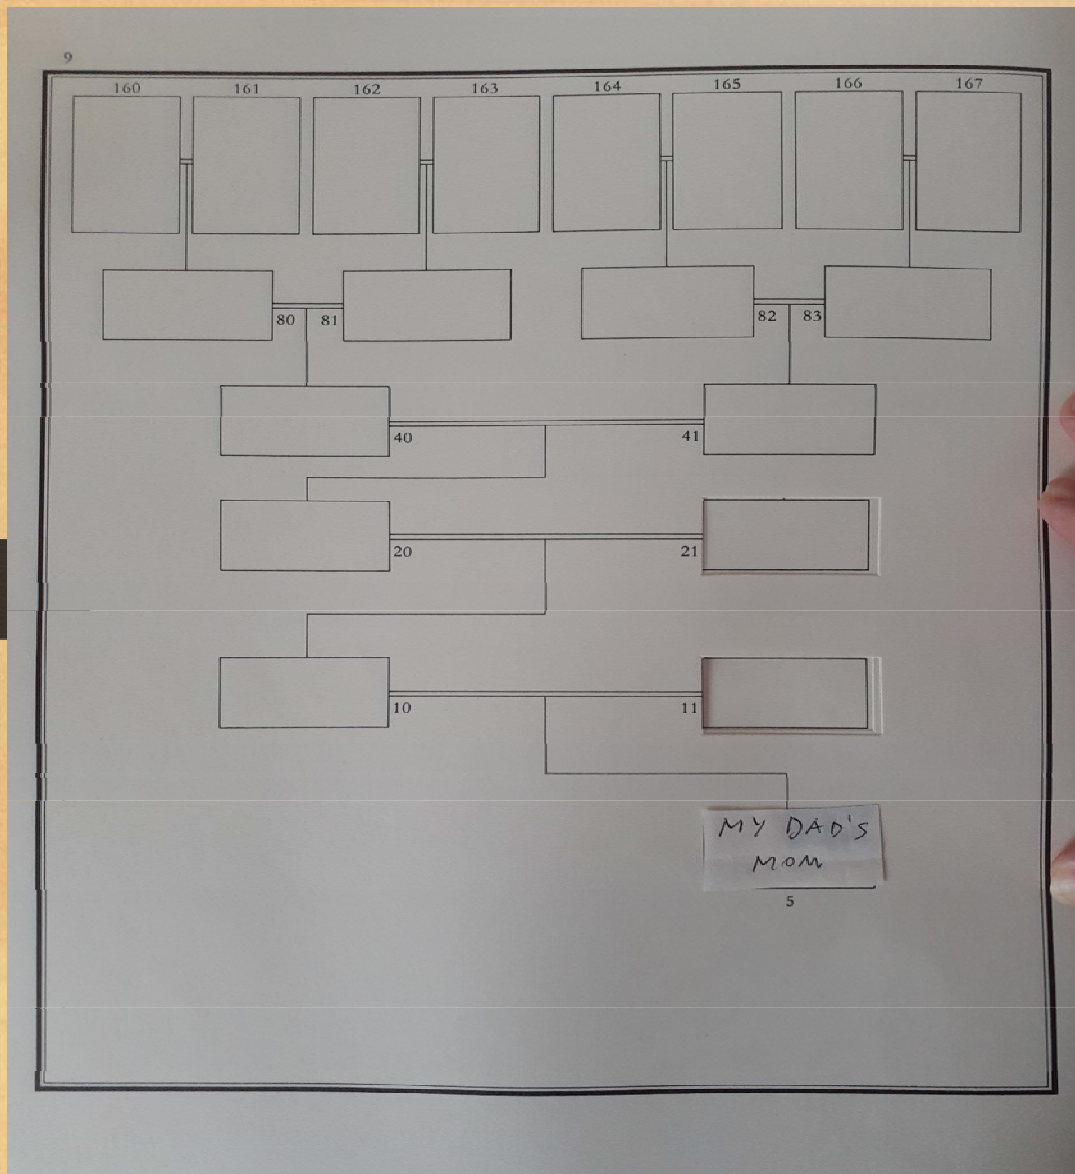

It is a collection of Diagrams for Pedigrees so arranged that 8 generations of the Ancestors of any person may be recorded in a connected and simple form.

It allows up to 8 generations of which will contain 255 people in total.

Generation 1 is You and generation 8 is your 5<sup>th</sup> Great Grand Parents

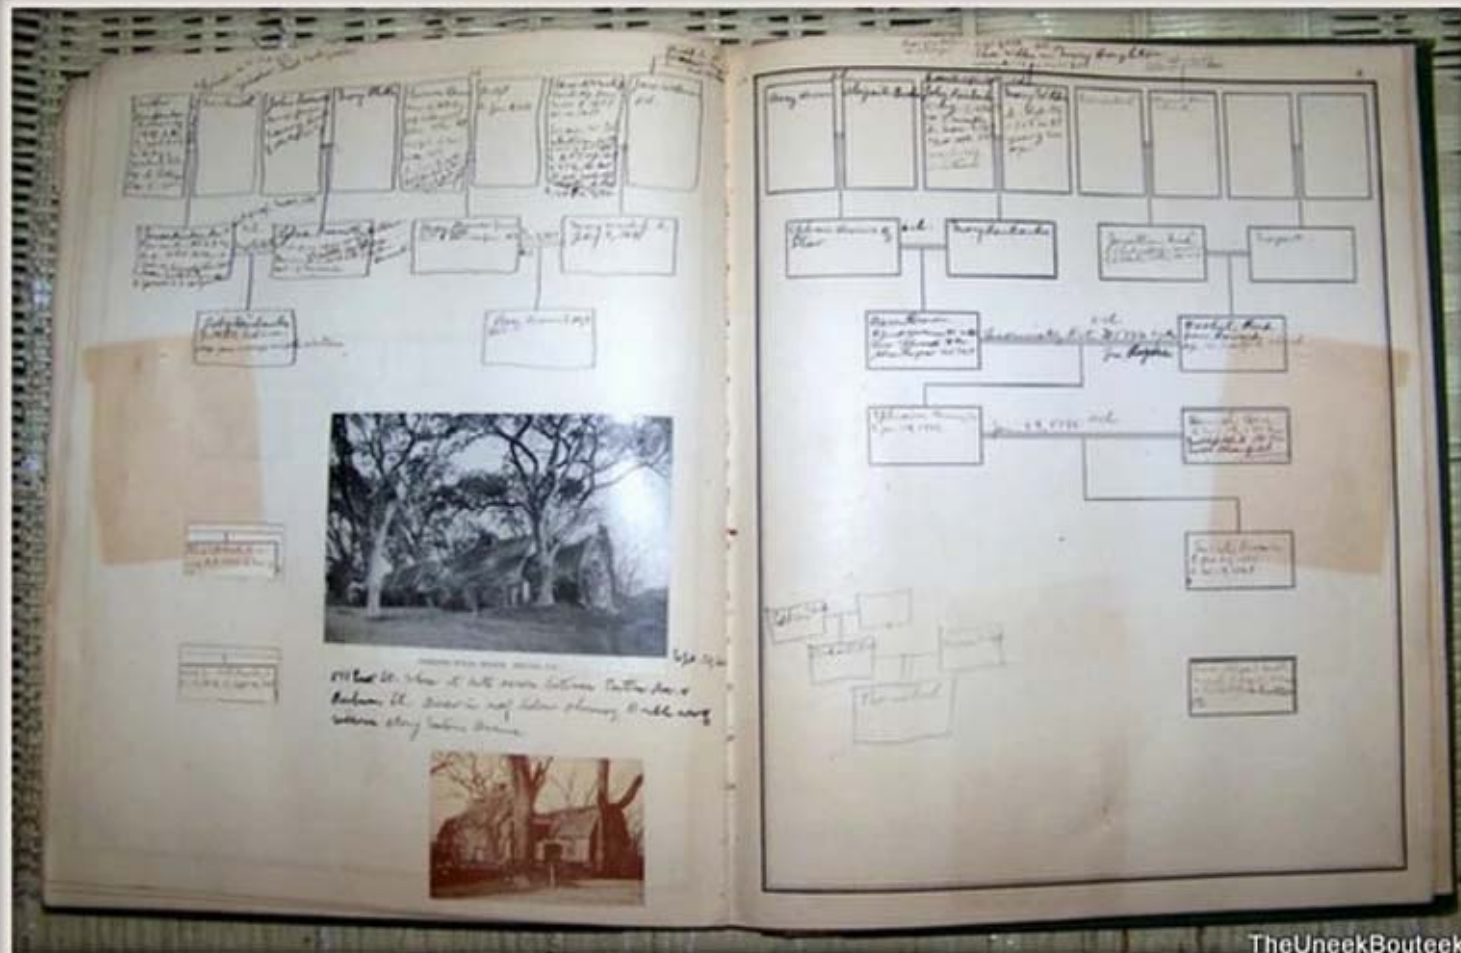

After turning the pages to my dad's mom.

My father's side will be odd numbered and my mother's side will be even numbered.

The opposite pages are blank, be it odd or even. You can write notes on these pages and on the margins. You could also include photos.

My book dimensions are 10" by 14" and the square boxes are 2 cm x 4 cm. The boxes are just large enough to hold the full name, birth, death and marriage dates.

## The Third Generation

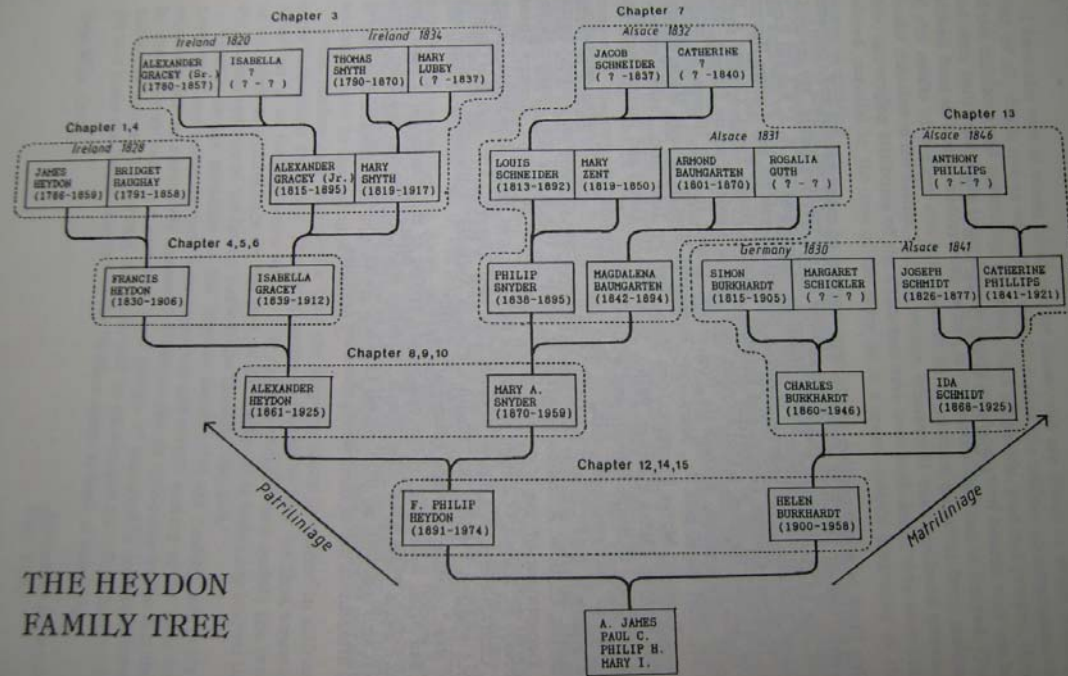

Like the families of many accomplished men in history, most of Francis and Isabella's children seem to have led somewhat directionless lives, and died in relative obscurity. Of the six children, only Alex Heydon and his youngest sister, Mary O'Connor, left a legacy of children. Three of Alex's siblings also shared the misfortune of an early death.

\*\*\*\*\*

Francis Joseph Heydon (b. 1868, d. 1908), the second eldest son, also followed a career in the hotel business. In the mid-1880s he worked as a bartender at the old *Carlton Hotel*. He also ran a small grocery store just north of the hotel when the *Heydon House* was built in 1891. Between these occupations he saw a brief employment with O'Keefe & Company brewery.

By 1905 Francis J. was employed as a bartender at the *Sherbourne Hotel* (on Sherbourne Street) and was married to Annie Slaver (or Slavin ?). In 1906 the couple moved to 651 Markham Street and Francis and Annie then became employed as the manager and post office clerk for the *St. Alban's Hotel*. This inn stood on the site which is now occupied by 'Honest Ed's Warehouse,' at the corner of Bloor and Markham Streets.<sup>1</sup>

The proprietorship of the *St. Alban's Hotel* was exactly the opportunity that Francis J. needed in order to compete with the success of his older brother. Unfortunately, in the spring of 1908, he died of a tubercular ulcer at the age of 40 years.<sup>2</sup> His wife Annie continued to work at the hotel for a short time, but

# Sample of a (My) Family Tree

From the Perkins Bull collection in Brampton

2007/08/09 16:53

# Who is William Perkins Bull

William Perkins Bull was a Peel-raised self-made industrialist, philanthropist, and historian who in the 1930s sent teams of researchers throughout Peel to gather facts about the history of the area and its people. His collections are the single greatest source of knowledge about Peel's history.

Bull's researchers collected information on early families of Peel by searching newspapers and archives and conducting surveys and questionnaires. They grouped their notes under family surnames.

There's a lot of information, however, you have to keep in mind that the information in these files is

- a) second-hand and so inaccuracies may have crept in; (my family tree has missing members 2<sup>nd</sup> generation)
- b) in the form of rough notes and not polished family histories; and
- c) not necessarily related to your ancestors of the same name.

Region of Peel Archives, 9 Wellington St E, Brampton, ON L6X 2J8

## FAMILY HISTORY.

Name? Capt. Charles Hare  
 Lot & Concession? Port Credit (Lot # 6, so. side of Park St.) 1857  
 Date of birth? 1826 Date of death? 1907  
 Place of burial? St. Peters Cemetery, Brindale  
 Parents? Peter (?) Hare  
 Where did they live? Just east of Etobicoke River in York Co.  
 From where did they come and when? Hull, England in 1837  
 Wife's name? Sarah Ann Anderson  
 Wife's parent's names? Anderson and Lester  
 Wife's father's place of residence? (Died in England mother & child came to Canada)  
 Date of wife's birth? 1828 Date of wife's death? 1875  
 Place of wife's burial? St. Peters Cemetery, Brindale  
 What was Capt. Charles Hare's Occupation? Captain of a sailing-ship  
 Religion? Meth.  
 Politics?  
 What offices did he hold in the Community, Township, County, Province, School and Church?

To what Societies or Military Organizations did he belong?

Did he raise any pure-bred stock? If so, what breed?

## ALSO OWNED:

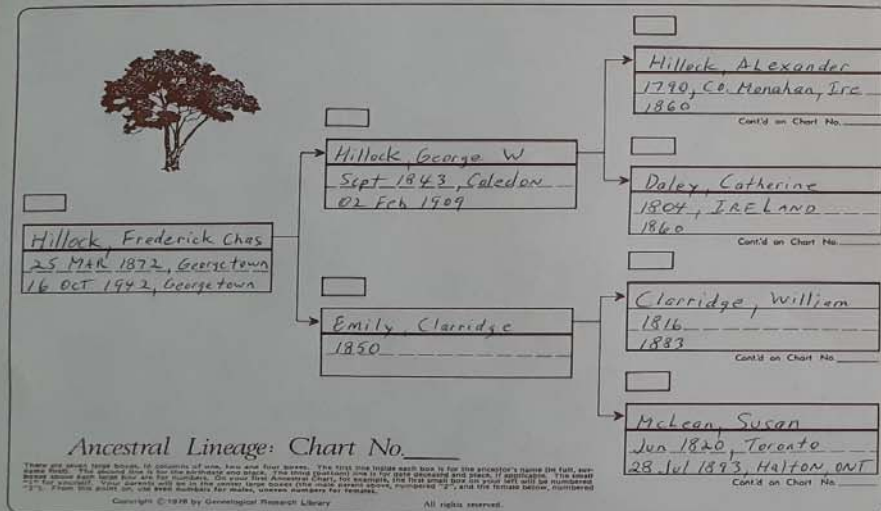

## Any further information:

Charles Hare was 11 years old when his father came out from England, and settled in Etobicoke Twp. operating a toll-gate near the Etobicoke River in York Co. The boy's first work was with a farmer on the Dundas Highway, but, being descended from fisher-folk, his great interest was in boats, and he saved his money and bought a half interest in a stone hooker, the "Mary Ellis". He and his partner, Mr. Dick Corby, hauled stone into Toronto, some of which went into the old Union Station and the Mail Building. They also carried cord-wood, lumber and sand. Captain Charles Hare sailed the lake for many years in the days when Port Credit was a busy harbour, and became one of the best known captains of his day.

In the 70's kits were created for people to help those who were interested in Genealogy

# Genealogy in the Computer Age

---

- In the 70's microcomputers for home use were being manufactured.
- Computer magazines started to be publish.
- Simple Genealogy programs were being created for shareware. Some were also free.
- In 1979, two magazines, Personal Computing and BYTE, are the first known magazines to publish copies of a genealogy program.

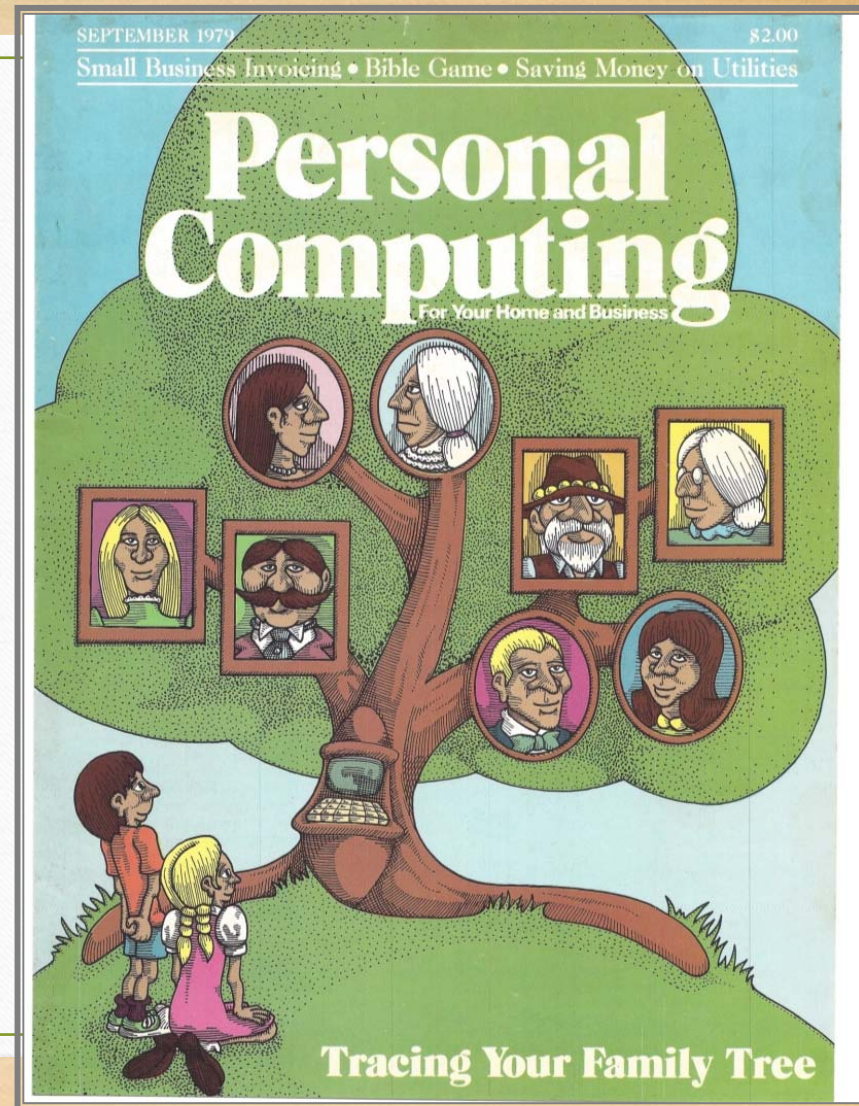

# Tracing Your Family Tree

## Roots and Branches

WRITTEN BY JOHN J. ARMSTRONG

COMPUTER SYSTEM: TRS-80 32/48 K  
RAM DISK PRINTER

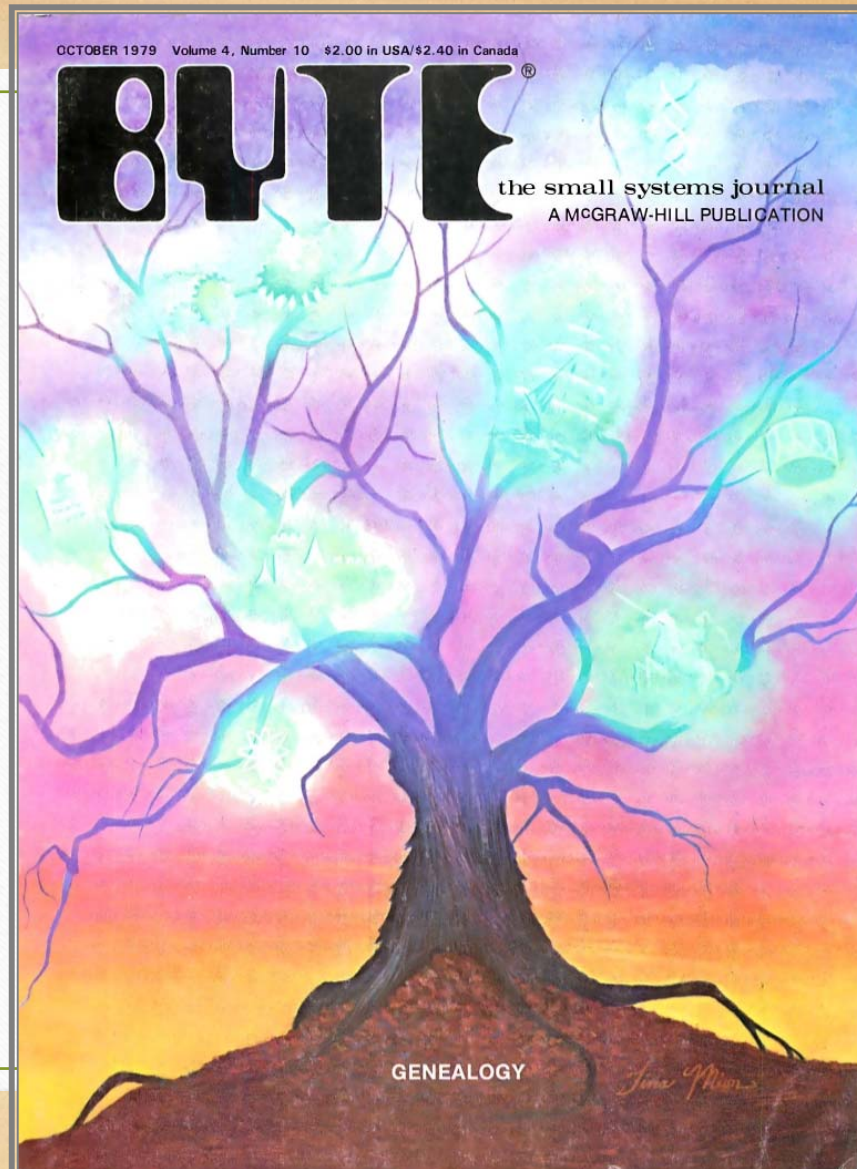

# Tracing Your Own Roots

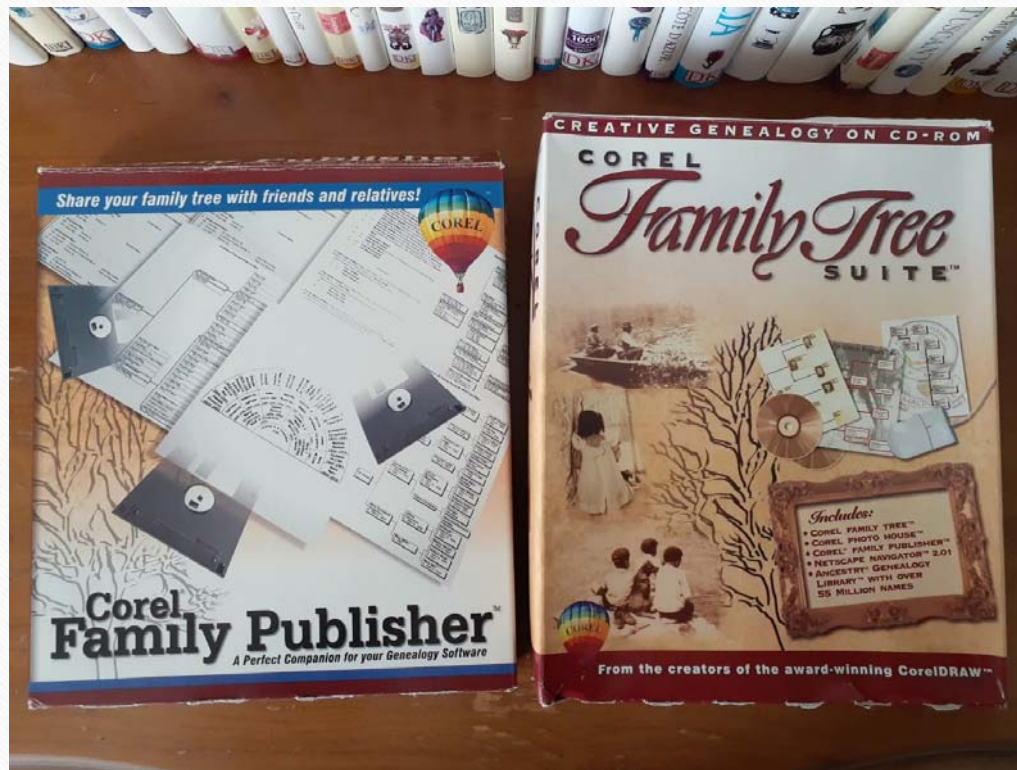

WRITTEN BY STAN W. MERRILL

This genealogy program was written on a DECsystem 2050 at the University of Chicago, using DEC's BASIC Plus 2.

By the mid 80's there were many different shareware, freeware and Software companies creating genealogy programs. By 2022 many are still around and some that have fallen, the products that is.

As of September 13, 2022, Corel has changed it's name to Alludo

All programs by the mid 80's were saving their information in different formats that made them incompatible with each other when family members were sharing. They either had to have the same program or had to re-enter the data. Some could import other programs but not all and not all would import the same ones. So what to do? Well the answer was the introduction of GEDCOM.

# What is GEDCOM

GEDCOM is an acronym for GENEalogical Data COMMunication

It's a standard method used to format your family tree data into a text file. The file is written in a code and a genealogy software program is used to read and convert the coded text file. This text file is used as a way of transferring family tree data from one genealogical website or software to another. It is possible to open a GEDCOM file in a word processor program. However, these files contain large blocks of text and can be difficult to read and understand.

The GEDCOM file format was created by The Church of Jesus Christ of Latter-day Saints (LDS) (aka the Mormon church). The original GEDCOM file specification was released in 1984 with the latest version, GEDCOM 7.0 released in 2021. Most current genealogy programs have the standard of 5.5.1. Between 1999 and 2019, there were no updates. It was as if LDS was busy with other projects. Many software builders would add some of their own features to the standard which was allowed by the standard itself. This led to some data not being recognized by others leading to data loss between transfers. In 2019 a group of people decided to update 5.5.1 to fix some problems with the standards, such as labeling 5.5.1 as the standard and not a draft. LDS had resumed ownership of the standards and is working with a committee to update the standards, starting with version 7.

Philip Brown, who created the “Family History System” program in 1984, added GEDCOM version 1 to his program in 1988. His program is the only known one to read and write this version. LDS had released their first program in 1984 without GEDCOM. Their program was called Personal Ancestral File (PAF).

LDS in 1986 released PAF 2.0 with GEDCOM 2.0. A problem with PAF was that a lot of times it didn’t follow it’s own standard for years.

## I currently use the programs: Family Tree Maker, RootsMagic and Heredis.

FTM – allows you to sync your tree from a computer to your tree online thru Ancestry.com.(pay site). The web site will time to time find what could be possible hints to family members. You can also search using Ancestry and LDS's Family Search web site from within the program.

RootsMagic – allows you to create cd's of your family tree to give out to family members. They will be able to review but not be able to make changes. At one time it had an app that would only allow you to view your tree on a phone or a tablet.

Heredis – has a app for the phone and tablet. You can make some changes of your tree on these devices. After making changes, you just transfer the data from the device back to your computer.
