

Scripting? Automation?

- Scripting
 - Perform tasks using a scripting language
 - (shell scripting, PowerShell, BASH, etc.)
 - Script often call other processes to do things
- Automation
 - Automatically run a process or script
 - Typically as a scheduled task

Three examples

Update virus signaturesWake drive before backup

■ Analyze web data using Excel

2

Why script & automate

Repetitive tasks

- Manual
- Scripted
- Slow
- Fast
- Inconsistent
- Consistent
- Run when there
- Automated
- Forget
- Run when you want

5

4

Example 1: Updating AV signature files

- Windows Defender checks once a day
- New signatures 9 times per day

Option 1:
Check for updates

Windows Update

Result Frequent check for updates I never have to remember If my task fails - Windows Update

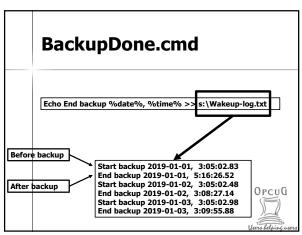

14 15

16

18 19

Result Backup drive - Spooled up before backup Log file - Start / end times

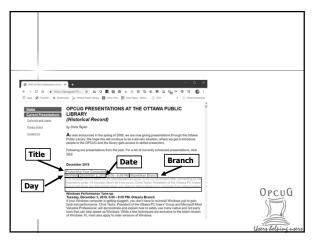

Example 3: OPL Presentation List

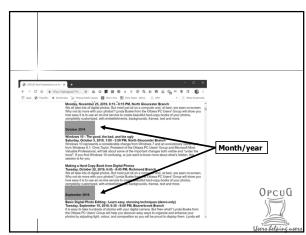

- Web page
 - 584 presentations
 - Growing ~70 per year
- Analyse in Excel
- Easier done than said
 - Once you script it!

Result

■ Easy to analyse data about programs

- What was given

- When was it given

- Where was it given

- Etc.

■ Can provide to OPL

- Can aid their planning

54 55

■ Get list of files & folders in "documents"
