## Artificial Intelligence

The Ottawa PC Users' Group (OPCUG) invites the public to participate in its upcoming **online** presentation **Artificial Intelligence** at the **Wednesday, November 13<sup>th</sup>** general meeting.

AI has become big news, particularly ChatGPT which, among other things, can write essays to order, an ability that the media built up to be (almost) the end of civilization as we know it. This talk will give us a clearer picture of what AI is, what it can do and what will be left for us to do.

Brett Martensen, founder of Adaptron Inc. studied physics at UBC and earned his MSc at Queens. At the same time, he pursued Artificial Intelligence research as a hobby. In 2002 he founded Adaptron Inc. to continue the research inside a corporate structure.

Details at:

<https://opcug.ca/events/artificial-intelligence/?occurrence=2024-11-13>

The meeting will be via video-conference. It opens at 7:15 p.m.

OPCUG is a not-for-profit organization located in Ottawa, Ontario. Our motto is *Users helping users*, a task we have undertaken for over 40 years. Every 2<sup>nd</sup> Wednesday of the month (except July and August) we present a topic that is of interest to our membership and the public at large. Guests are welcome.
